

IS YOUR ONLINE SHOE STORE ADAPTED TO YOUR CUSTOMERS?

CUSTOMIZING OPTIONS

NAVIGATION

Don't fill your drop-down menus with infinite options, be concise and descriptive to make possible a smooth navigation... and be careful with your loading speed!

SEASONALITY

If you sell shoes for a different range of uses and purposes, be seasonal and make your site different whenever the season changes. Your customer wants to see sandals in summer and boots in winter!

CUSTOMER SUPPORT

Make your contact information visible and ensure that you can face your customer's demand at all times. You can make sure of that with an outsourcing customer support solutions partner!

SENSORY EXPERIENCE

Make up for the lack of a tangible experience with multimedia content, a detailed sizing guide and many videos to support your shoe display.
